

THE POWERWAND™ EDC

Extended Dwell Catheter

Infection Prevention by Design

Ideal for:

- Difficult IV access
- Vein preservation
- Infection Prevention
- Renal patients

One Stick Hospitalization

The 3Fr, 6cm **POWERWAND™ EDC**

Trust POWERWAND

Made of ChronoFlex C® with BioGUARD Technology™ which is proven to inhibit bacterial attachment (in vitro)¹ and resist thrombus formation (in vivo)². With over 35,000 catheter-days without a bloodstream infection (BSI) and the highest completion of therapy[‡] of any device in its class, it provides unparalleled safety for patients.

Unrivalled Performance

- ▼ Extended Dwell (up to 29 days)
- ▼ Blood Drawable
- ▼ High Flow (75mL/min)
- ▼ Kink Resistant
- ▼ Power Injectable (8mL/sec)
- ▼ 0.0% BSIs over 35,000 catheter-days
- ▼ Highest completion of therapy
- ▼ Lowest complication rate (i.e. infiltrations, phlebitis, etc.)
- ▼ One stick hospitalization

Code	Description	Qty/Box
94122	POWERWAND™XL Single Sterile, 3Fr (6cm)	10
94123	POWERWAND™XL Quick Kit, 3Fr (6cm)	10
92019	POWERWAND™ED Single Sterile, 3Fr (6cm)	10
72627	POWERWAND™ED Quick Kit, 3Fr (6cm)	10

1. Proven in vitro to significantly ($p=0.0133$) inhibit bacterial attachment and biofilm formation* as compared with a commonly used polyurethane catheter[†].
 2. The POWERWAND is proven in vivo to be thromboresistant with respect to both thrombus on the surface of the catheter and thrombus on the wall of the vein. Based on canine jugular vein thromboresistance study, correlations to clinical applications has not been ascertained.
- ‡ Based on laboratory test results which may not be indicative of clinical results. Data on file and refer to publication[‡]. Preclinical in-vitro evaluations do not necessarily predict clinical performance with respect to catheter-related bloodstream infection.
3. Pathak R, Bierman S, d'Arnaud P. Inhibition of bacterial attachment and biofilm formation by a novel intravenous catheter material using an in vitro percutaneous catheter insertion model. Medical Devices: Evidence and Research. 2018;11:1-6. <https://doi.org/10.2147/MDER.S183409>
